SOFTWARE ENGINEER

I'm a motivated Software Engineer with experience in freelance web development and software validation. I build responsive, user-friendly websites using HTML, CSS, and JavaScript, and work with backend tools like SQL. I'm certified in cybersecurity and cloud platforms, with a strong interest in cybersecurity and a passion for creating clean, efficient solutions.

WORK EXPERIENCE

Web Developer| Freelancer 2022 - present

- Developed websites for small businesses, improving their online presence and customer reach.
- Led front-end development using CSS, JavaScript, and HTML, ensuring responsive and user-friendly designs. Also contributed to backend development, enhancing versatility in web development projects.

Developer| Media FF, Germany 2023-2024

- Assisted in project management.
- Handled software error detection and resolution, improving system efficiency.
- Conducted software verification and validation, ensuring compliance with industry standards.
- Contributed to coding tasks using SQL and Ninox, enhancing the database functionality.
